

# Radiation Stress

The spinning core of the earth sets up a huge natural magnetic field and generates electrical charges. Through time, humans have adapted to this mild radiation. In fact, it is beneficial and even essential for our health to experience these Schumann waves (7.8 Hz) as well as solar and cosmic radiation.

However, in our modern world, we are now constantly bombarded and exposed to million times higher radiation coming from *external sources* eg:

- household electricity (fridge, hair dryers, baby monitors etc)
- mobile phones
- computers, iPad
- Wi-Fi
- TV
- bed-side alarms
- microwaves
- radar
- x-rays
- nuclear radiation
- high-altitude flying
- and geopathic stress

Because humans are vertical, we act like antennae for these **electromagnetic impulses (EMFs)**. We also “gain” more of this radiation from irradiated food products. Wow! The worst part is that this is a silent stress that enters the body unchecked – one that we don’t see, smell, taste, hear or feel until the signs and symptoms show up.

This radiation directly affects our cell structure and function by stimulating a chemical response in the body and indirectly by being stored in the water of the body. (Remember: Water has memory!)

So, it affects our metabolism, cell growth, hormone production and immune system. It disturbs the pH and affects the oxygen-carrying capacity of our red blood cells.

This may clinically present as:

- anaemia
- brain fog
- fatigue
- listlessness
- painful joints
- infections
- cancers
- arthritis
- thyroid issues etc.

**Geopathic stress** occurs when the earth’s natural radiation is interrupted by abnormalities in the earth’s crust, underground water veins, fissures and faults. The effects are more pronounced when located near a sleep zone or in the workplace where one spends a lot of time.

*Signs and symptoms of geopathic stress in the sleep zone*

- breathing difficulties / asthma
- cold feet or legs in bed
- disturbed sleep
- talking in sleep
- nightmares
- sudden cries while sleeping
- grinding teeth
- waking tired
- excessive sleep need
- inflammation of veins
- perspiration “attacks” during night
- restless legs
- calves cramp

In Children:

- bedwetting
- getting out of bed
- rocking upper body
- rolling and banging head

## How can BICOM Bioresonance assist?

The effects of EMF and Geopathic radiation stress can be tested using specific test vials and treatment can be offered to counteract the effects.

Treatment may include: BICOM Radiation Programs, Specific recommendations to remediate home / sleep zone and office as well as treatment of specifically affected organs.

If you are suffering from any of the symptoms mentioned above, then consider making an appointment with us.
